TOP STORY

The 2026 Palm Coast Fall Activity Guide Now Available

Fall is fast approaching, and the City of Palm Coast's 2026 Fall Activity Guide is now live, offering a variety of programs, activities, leagues, tournaments and special events for residents of all ages. https://www.palmcoast.gov/parks-and-recreation

MORE NEWS STORIES

Whether we are alumni of Matanzas High School or Flagler Palm Coast High School, or proudly supporting the schools our children attend, the City of Palm Coast stands united in our commitment to the community we cherish, especially during beloved hometown traditions like the Potato Bowl.

The City of Palm Coast observed Water Quality Month in August and was proud to announce the publication of the 2025 Annual Water Quality Report, which is now accessible for residents to view online at https://www.palmcoast.gov/utility/wqr.

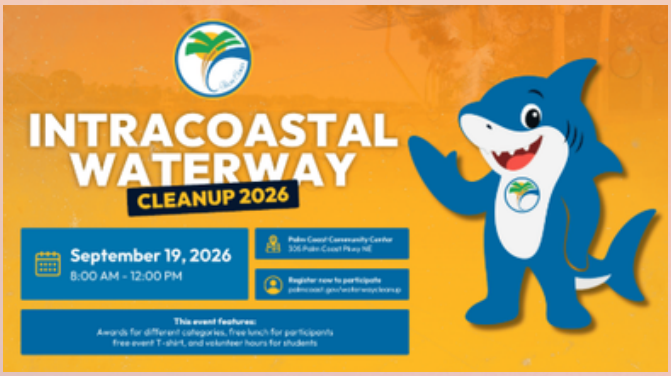

A number of Palm Coast projects are nearing completion, including the Waterfront Park new parking lot/pavilion, the Whiteview Parkway Safety Improvement Project, New Fire Station 22, and P1 Weir installation in the R section. For updates on projects like this , visit palmcoast.gov/pcprogress.

UPCOMING EVENTS

Stay current with City of Palm Coast Events: palmcoast.gov/events

PARKS & RECREATION

COMMUNITY PROGRAMMING

Parks and Recreation provides over 300 annual programs catering to all community members, from toddlers to seniors. These programs take place at various locations, including the Palm Coast Community Center, Southern Recreation Center, Palm Coast Aquatic Center, and Palm Harbor Golf Course.

Our youth programming at the Community Center kicks off after a short summer break. This month, we launched with Monday Funday, which saw a fantastic turnout on the first day of classes. We were also pleased to welcome the Early Learning Coalition of Flagler and Volusia, who provided valuable parental resources and toddler calming activities. Additionally, we hosted Little Sensory Explorers and our Middle School Teen Aftercare program.

At the Aquatic Center, our dedicated staff delivered 63 private swim lessons, supported our Competitive Swim Development team, and hosted the Matanzas Swim Team for practices and swim meets. Youth Pickleball remains incredibly popular at the Southern Recreation Center (SRC), with our recent camp attracting 15 participants aged 8-17, offering a wonderful chance for young players to grasp the fundamentals of the sport. Meanwhile, the Palm Harbor Golf Course celebrated its first-ever Kids Summer Send-off Program, introducing 29 kids and their parents to the joys of golf by playing four holes together on a Friday evening.

For our regular adult and senior programs, we are excited to introduce new offerings this fall. The Garden Gurus series, in collaboration with the Palm Coast Garden Club, consists of five classes aimed at helping participants tackle common gardening challenges in Florida. Our Autism Spectrum Disorder (ASD) social group recently convened to plan their activities for Fall 2026, providing a fantastic opportunity for participants to share ideas and shape an engaging lineup for the upcoming season.

We continue to offer a variety of fitness options, including Aqua Zumba, Water Aerobics, Zumba, Line Dancing, F.I.T. 4 Life exercise classes, as well as yoga, tennis, and pickleball programs. Our adult open gym sessions remain a great way for community members, both residents and non-residents, to stay active, meet fellow players, and engage in organized recreational activities through basketball and volleyball programs.

PARKS & RECREATION

PARKS, TRAILS, SPORT FIELD MAINTENANCE

With an impressive 827 acres of landscaped areas, 26 athletic fields, 12 miles of trails, and 14 parks, our Parks Maintenance Division ensures that all residents have access to safe and enjoyable green spaces.

Parks and Trails

In addition to our routine tasks such as mowing, landscaping, trimming trees and shrubs, checking irrigation, applying fertilizers, and treating with pesticides and fungicides, our team has been engaged in several larger projects and repairs. Irrigation work has been ongoing at various locations, including Holland Park, Lehigh Trailhead, Central Park, Heroes Park, and the Southern Recreation Center.

Recent Projects Completed This Month:

- Several sections of pavers at Central Park were repaired and reset to eliminate trip hazards and enhance pedestrian safety.
- Playground repairs at Holland Park included fixing the zip line, supporting the swing set, and replacing the tunnel climbing net.
- Our team assisted with adjusting security cameras at Ralph Carter Park and Holland Park, which involved providing and operating a lift to safely access the cameras.
- Additional fungicide treatments were applied across multiple parks to protect the turf, given the ongoing wet and humid growing conditions.

Field Maintenance Update

- The Field Maintenance staff diligently mows all sports fields and the Lehigh High Trailhead dog park twice a week to ensure an appealing appearance.
- In response to an outbreak caused by heavy rain saturation in early August, our spray technician applied emergency fungicide treatment across multiple fields.
- Additionally, in late August, insecticides were applied to all sports fields after damage was observed at Belle Terre Park's multi-purpose fields and the ITSC baseball/softball fields.

Permits and Tournaments

- A total of 334 permits were approved, with 120 fields painted in August alone.
- The Indian Trails Sports Complex successfully hosted two consecutive weekends of tournament play, organized by Sporting Palm Coast, one of our local soccer organizations.

These tournaments resulted in an estimated economic impact of $1,771,560 for our community.

FIRE DEPARTMENT

SAFETY EXPO SUCCESS

The Palm Coast Fire Department was delighted to partner with the Flagler County Sheriff's Office for the 2026 Safety Expo! We had a wonderful time engaging with our community, sharing vital fire safety information, displaying our equipment, and connecting with families alongside our law enforcement colleagues. A heartfelt thank you to our volunteers who represented us at this community event!

FIRE DEPARTMENT

FIRST RESPONDER BREAKFAST

The Palm Coast Fire Department expresses our sincere gratitude to the congregation at St. Mark by the Sea Lutheran Church for organizing a First Responder Breakfast. Your effort in recognizing and honoring the dedicated men and women who serve our community means so much to us. We take pride in serving a community that fully supports its first responders.

9.11 MEMORIAL SERVICE

The Palm Coast Fire Department is pleased to announce the return of its annual 9/11 Candlelight Vigil at Heroes Memorial Park on September 11, 2026, at 6:30 PM, marking the 25th Anniversary of the attacks. This heartfelt memorial will pay tribute to and remember those who were lost on 9/11 and in the days that followed.

CARSEAT PROGRAM

Our department consists of trained technicians who specialize in assisting with the installation of child passenger safety seats. The primary aim of this program is to prevent fatalities or severe injuries to children by ensuring that safety restraints are installed correctly. If you have any questions about your child's safety seat, feel free to visit any of our fire stations.

UTILITY DEPARTMENT

Five-year Wetland and Groundwater Monitoring Program Summary

Water Treatment Plant staff, in coordination with CPH Consultants, completed a five-year monitoring program to document wetland characteristics and evaluate potential effects associated with wellfield withdrawals. The monitoring program was previously approved by the St. Johns River Water Management District (SJRWMD) and included the installation of representative monitoring well clusters to evaluate the relationship between groundwater levels and surface-water levels within the wellfield area.

The monitoring program includes the establishment of vegetation monitoring plots within selected wetlands representing conditions at the wetland/upland boundary, hydric soil conditions at the surface, and muck-at-surface conditions. The program also requires continued monitoring of shallow groundwater wells adjacent to wetland transects and monitoring plots, documentation of soil conditions, and the collection of both qualitative and quantitative data along each established transect and plot.

The purpose of the monitoring program is to improve the understanding of the relationship between rainfall, surface-water levels within wetlands located in the wellfield area, groundwater levels, and groundwater withdrawals

Northern wellfield Monitoring Wetlands

Southern wellfield Monitoring Wetlands

Overall, the monitoring data indicates that the monitored wetlands continue to be supported by the existing water-table conditions. Water levels are present due to variations in rainfall frequency, intensity, and seasonal conditions. The overall record demonstrates that precipitation is the primary driver influencing wetland water levels. The continued increase in groundwater consumption during the monitoring period, without a corresponding adverse trend in wetland water levels, provides additional support for the conclusion that existing wellfield withdrawals have not produced a measurable adverse impact on the monitored wetlands.

The five-year monitoring program provides valuable baseline and operational data for continued evaluation of the relationship between rainfall, groundwater conditions, wetland hydrology, and groundwater withdrawals. The information collected will assist the City and SJRWMD in evaluating future wellfield operations and water-supply planning while continuing to protect the environmental resources associated with the Palm Coast wellfield.

The City received notification from the Florida Department of Environmental Protection that the recent State inspections of Wastewater Reclamation Plant #1, Water Reclamation Plant #2, and Water Treatment Plant #3 determined that the facilities are following applicable Department rules and National Pollutant Discharge Elimination System (NPDES) requirements. The inspections also included a review of stormwater structures and related infrastructure located within the facilities.

STORMWATER & ENGINEERING

STORMWATER MAINTENANCE

Swale Maintenance

- Maintenance crews enhanced 58,510 linear feet of swales and cleaned approximately 677 residential culverts in preparation for swale upkeep, concentrating on the L and B sections. In September, crews will continue their efforts in the E, U, S, and B sections.

Pipe, Concrete & Asphalt Projects

- Three pipe projects were successfully completed in August, including Packard Lane, Wheatfield Drive, and Wheeling Lane, totaling 975 linear feet of pipe replacements. In addition, concrete and asphalt operations finished a total of four projects, installing 32 tons of asphalt and 26.5 yards of concrete.

Canal Maintenance

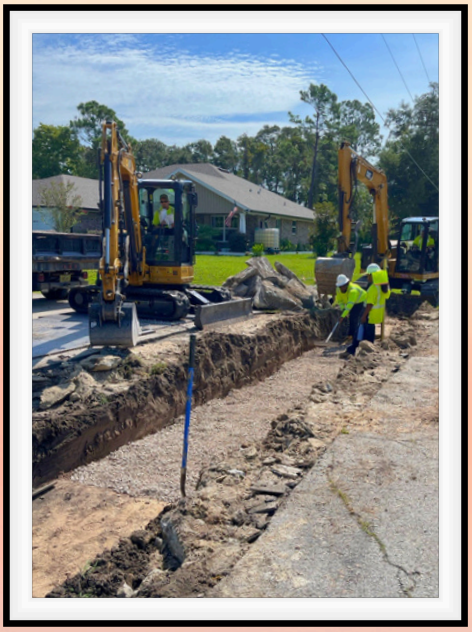

- Improvements were made to the canals at Seminole Woods, Kaffir Lily Lake, and Little Canal. Crews utilized machinery to clear over 4,700 linear feet of waterways, effectively removing accumulated vegetation and debris.

Ditch Maintenance

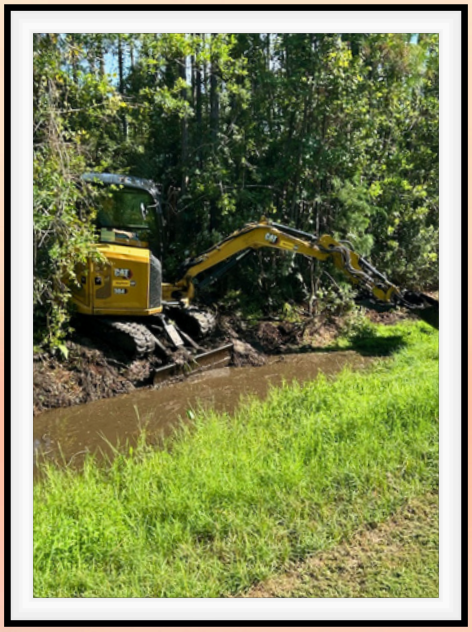

- Throughout August, routine maintenance was conducted in the K, LL, Z, E, and R sections, along with mowing activities in the W section. These efforts resulted in 303,990 feet of ditches treated for weed control, 228,456 feet of ditches mowed, and 31 tons of debris removed, significantly enhancing overall drainage.

STORMWATER & ENGINEERING

CAPITAL PROJECTS

Colbert West Conveyance Improvements

Work involved completing the upstream headwall footer and box culvert base, as well as installing reinforcing steel and setting up forms for the upstream box culvert walls. As of August 14, 2026, the foundation work for the upstream box culvert has been finalized, which includes rebar installation and forming of the culvert walls. Additionally, rebar installation and forming for the wing wall foundations have also been successfully completed. Work is progressing as scheduled.

Pine Grove Canal Dredging

Dredging operations continue on the upstream side of the canal, alongside the slope formation and grading of the canal banks.

DEVELOPMENT & RECOGNITION

Employee of the Month – Cameron Wright

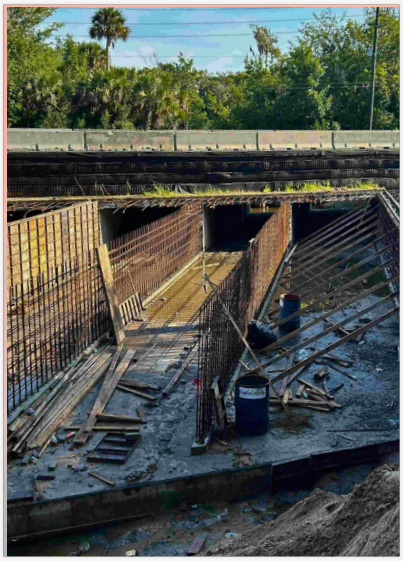

Cameron has made a remarkable impact on our team by consistently stepping up, ensuring smooth operations, and bringing a steady, positive energy to our environment. His reliability and laid-back demeanor have made a significant difference in our daily workflow. We are pleased to honor Cameron as our Employee of the Month. Thank you for all your hard work and for keeping the workplace vibrant with your smile!

Promotions

- 3 staff members promoted to Full-Time Maintenance Workers
- 3 staff members promoted to Equipment Operators II

Training

- 8 staff completed Heavy Equipment Operator Training Level 1
- All staff attended Emergency FEMA Form Training
- 3 staff completed Certified Stormwater Inspector Training
- 14 staff completed Confined Space Training
- 4 staff obtained a Commercial Driver's License

Colbert West Improvements

Heavy Equipment Operator Training

COMMUNITY DEVELOPMENT

Building Division / Residential Site Development Division Monthly Report

In August 2026, the Building and Residential Site Development Divisions focused on the following initiatives:

- Continued implementing several process changes stemming from HB803, which was signed into law by the Governor on May 6th. The new regulations took effect on July 1st.
- Finalized the FY27 budget, with notable highlights in the Building budget, including four frozen positions (three inspectors and one Deputy Chief Building Official), two unfilled positions (inspectors), reductions in both direct and indirect FTEs, a decrease in fleet vehicles, and over seven line item reductions ranging from 20% to 25%. The RSD budget saw a minimal increase over FY27.
- Progressed on changes to the Right-of-Way (ROW) permit process.
- Continued modifications to Final Lot Grading & Drainage plans and Certifications for new subdivisions, including the development of plan review checklists for Subdivision Master Grading & Drainage Plans.
- Conducted ongoing analysis of the newly released 9th Edition – 2026 Florida Building Codes, which encompass the Florida Building Code, Florida Residential Code, Florida Mechanical Code, Florida Plumbing Code, Florida Energy Conservation Code, Florida Fuel Gas Code, Florida Existing Building Code, Florida Accessibility Code, Florida Fire Prevention Code, and the 2023 National Electrical Code. These codes will become effective on December 31, 2026.
- Completed the first of several large code book orders for the 9th Edition Florida Building Codes, effective on 12/31/26.
- Finished changes to the COPC Technical Manual concerning lot grading and drainage plans for pools and impervious additions exceeding 300 square feet. This is now ready for publication and contractor notification.
- Continued participation in the Saltwater Canal Dredging Initiative team.
- Coordinated the close-out of permits for the Promenade project, including the first building in Ocean Village, the completed Kensington project, and several buildings in Pointe Grand at Town Center.

August 2026 Permit Statistics

- 153 permit applications received for one- and two-family dwellings, totaling 1,068 permits issued year-to-date.
- 119 Certificates of Occupancy issued for one- and two-family dwellings.
- 1,133 permit applications received across all types.
- Conducted 6,235 inspections (including all City Departments).
- Completed 1,657 plan reviews.

COMMUNITY DEVELOPMENT

RESIDENTIAL SITE DEVELOPMENT

Monthly Activity Report | August 2026

August overview. Residential Site Development recorded 1,932 total activities during the month.

1,932	978	483	432	39

Technical & Process Updates

COPC Technical Manual
Completed and pending approval.

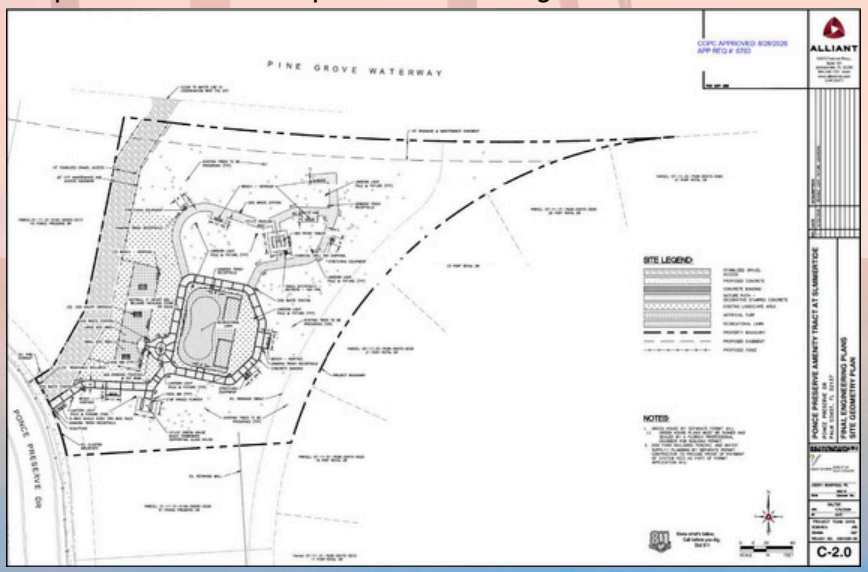

Lot Grading & Drainage Plans
Added additional information for pool review and approval.

Impervious Additions
Impervious additions exceeding 300 sq. ft.

Development Orders

6 applications were received in the month of August.

SummerTide (Ponce Preserve) Amenity – TSP 1 – AR # 6703
This Technical Site Plan was for the development of a subdivision amenity feature. It features a dog park, community greenhouse, recreational lawn, heritage benches, and outdoor stretching and conditioning equipment. It is located in the P Section on Ponce Preserve Drive. The project was administratively approved as a tier 1 technical site plan application. This site plan received a Development Order on August 11, 2026.

Coquina Shores Phase 1 – Final Plat – Ap. No. 6615
The Final Plat for Coquina Shores Phase 1 received a Development Order for approval on August 19, 2026. The subdivision is located on the North side of S.R. 100 approximately 0.25 miles east of Old Kings Road and will provide 223 Single Family residential lots with associated infrastructure on 281.82 acres.

PUBLIC WORKS

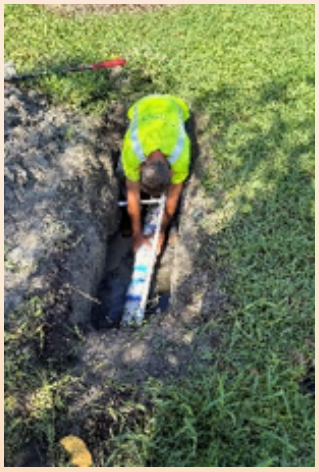

FACILITIES MAINTENANCE

During the month, the Facilities Maintenance team successfully handled 24 customer work orders and 4 internal work orders. These assignments covered various facility requirements, such as two HVAC repairs at the Stormwater Facility and repairs to the deck and ADA ramp at the Palm Harbor Golf Course. These initiatives are essential for maintaining the safety, functionality, and accessibility of City facilities, ensuring that necessary repairs are carried out without delay.

LANDSCAPE, MOWING, QUICK RESPONSE TEAM (QRT)

Throughout August, Public Works crews actively engaged in coordinated efforts for landscape management, irrigation, vegetation control, right-of-way maintenance, tree care, and neighborhood mowing across the City. These initiatives were particularly crucial during this month, as all teams operated under extreme weather conditions, facing high temperatures and heightened irrigation needs. Despite these challenges, the crews adhered to their schedules, supported each other across divisions, and consistently delivered maintenance and services throughout the City.

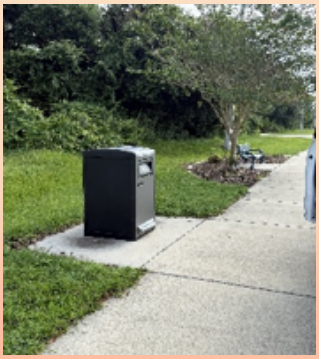

Median Detail Crew

The Median Detail Crew focused on maintaining medians and landscaped areas along key locations, including Belle Terre North & South, Bulldog Drive, City Hall, Palm Coast Parkway East & West, Old Kings Road, and Palm Harbor. Their tasks included trimming, edging, weed control, debris removal, and overall landscape upkeep.

Spray Division

The Spray Division carried out citywide pre- and post-emergent weed control, along with applying fertilizers, fungicides, and pesticides, which included treatments for pond weeds and algae.

Irrigation Division

The Irrigation Division conducted system inspections, performed repairs, and adjusted sprinklers to ensure proper coverage and efficiency. Right-of-Way crews continued their work with mowing, litter collection, trash receptacle servicing, vegetation management, and debris removal along major roadways, such as Palm Harbor, Palm Coast Parkway, State Road 100, Belle Terre, and Old Kings Road.

Tree Crew

The Tree Crew addressed hazardous tree conditions, fulfilled work orders, and managed trimming, limb removal, and debris cleanup. The Neighborhood Mowing Crew maintained its four-week mowing rotations in sections E, Z, U, S, K, and LL.

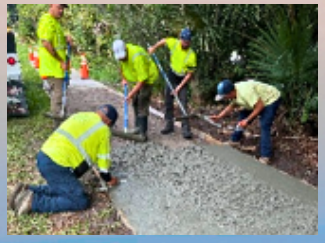

STREETS – SPECIAL PROJECTS

The Special Projects Team has successfully completed the new Food Truck parking area, which is set to open fully to food truck vendors on September 1, 2026. Additionally, the team has carried out several roadway repairs, fixed potholes, and replaced guardrails damaged in vehicle accidents. Unfortunately, Graham Swamp Trail remains closed due to severe structural damage and has now been designated as a Capital Improvement Project, with repairs awaiting future planning and funding.

Sign Improvements

The team is working on several new and refurbished city signs, which includes the construction of a new monument sign at the entrance of the Indian Trails Sports Complex.

Looking forward to September, the team will continue with citywide sidewalk repairs, roadway maintenance, pothole and edge-of-road repairs, monument sign enhancements, and may also initiate grading and land-clearing activities for upcoming projects.

PUBLIC WORKS

STREETS - SIGN & SIGNAL

The Sign & Signal Department was particularly active throughout August, managing a mix of routine maintenance, infrastructure enhancements, and prompt responses to service requests from the Flagler County Sheriff's Office, residents, and City departments. The crews accomplished the following:

- Installed new traffic detection cameras at various intersections
- Continued regular traffic signal maintenance along Belle Terre Parkway, Boulder Rock Drive, Palm Coast Parkway, Easthampton, and several other locations.
- Set up new fiber-optic connections to traffic signal cabinets to enhance system reliability and troubleshooting capabilities.
- Assisted Fire Station 26 with its emergency traffic signal system to facilitate safer emergency response operations.

Looking Ahead to September

In September, the department will focus on:

- Ongoing routine signal and sign maintenance.
- Updating traffic cabinet IP addresses and identification numbers to support the City's asset tracking system.
- Installing additional traffic detection systems.
- Providing continuous interdepartmental support.

FLEET DIVISION

Fleet operations experienced consistency throughout August 2026, as the team adeptly managed a heavy workload while navigating the challenges posed by the intense summer heat. The division is currently one technician short due to a recent departure and is actively seeking to fill this vacancy. Several promising applicants have come forward, and the team is optimistic about selecting and onboarding a qualified candidate soon.

Professional Development

Professional development continued to be a key focus:

- Jose Adriano achieved two additional T-Series ASE certifications and recertified in four A-Series ASE courses.
- Lee Morin and Randal Davidson participated in an EVT training class and completed the related testing, with results pending.

Performance Metrics

Performance metrics remained robust:

- A total of 270 fleet shop work orders were completed.
- 101 preventive maintenance services were conducted.

Downtime performance indicators revealed that 75.32% of repairs were finalized in under 24 hours, while technician productivity reached an impressive 85.19% for the month.

COLLECTION & SANITATION DIVISION

Residential Collection

In August, the Residential Collection Division recorded a total of 485 cases, with approximately 65% attributed to hauler responsibility. The most frequent case type involved requests for new resident recycling bins, with the hauler delivering 182 bins to residents. The second most prevalent category included bulk pickup requests, for which the hauler was accountable for collecting 100 out of the 197 reported requests.

Commercial Compliance

In August 2026, the Commercial Compliance Division collected a total of $13,044.51 in franchise fees. A new franchise agreement was established with Skyline Detailed Roofing, Inc. for Construction and Demolition services. Furthermore, 12 commercial dumpsters were inspected to ensure proper use of authorized haulers and to verify that dumpster conditions met applicable standards. No additional fees were recovered through proactive outreach efforts during the month.

The compliance staff also began the onboarding process for five junk removal companies to ensure their compliance and designate them as authorized franchisees:

- Amasa
- Seaside Dumpsters
- Waste Con
- D & M Maintenance Services, LLC
- PCF Junk & Demolition

RISK & SAFETY

August 2026 Risk & Safety Update

The City is dedicated to safeguarding the health, safety, and well-being of our residents, visitors, employees, and public assets. The Risk Management Division aims to identify, evaluate, and mitigate potential risks while fostering safe operations throughout all City departments.

Here's a summary of activities from August:

- We assisted the Fire Department in securing the FMIT Safety Excellence Accreditation (SEI Accreditation). This achievement reflects our commitment to safety and sets a benchmark for other municipalities. The City of Palm Coast attained a perfect score of 100%, the highest level of accreditation available. The award will be presented at the meeting on 10/20/2026.
- The Safety Team supplied "pop-up" cones to the Community Center to provide clear guidance for parents picking up their children and to highlight any potential hazards.
- The Safety Team facilitated nearly 50 employees in obtaining OSHA certified "Competent Person" certification across various specialties.
- August brought many hot days, accompanied by heat advisory alerts sent to all staff.
- The financial implications and savings from the review of the current property schedule are still under evaluation, being processed by The Florida League of Cities. The renewal is expected to be available this month.
- We are in the final stages of enhancing the emergency notification process for all current staff, with system testing currently underway.
- Six outdated AED units across the City have been replaced, with three more scheduled for replacement in September, ensuring that quality units remain accessible for residents and visitors at our facilities.
- The AED project will extend into FY27, with new locations identified for the installation of additional units.
- Annual facility inspections are ongoing.
- The safety topic for August focused on Defensive Driving, Vehicle Safety, and Road Safety.

Remember, safety never stops!

CITY MANAGER NEWS

EMPLOYEE OF THE MONTH

Francisco
DELGADO

Meet Francisco, the superhero of facility maintenance! With a heart as big as his tool belt, he's the go-to guy for all things broken and leaky. Whatever the issue, Francisco tackles it all with a smile and a can-do attitude. He's like a bolt of lightning when it comes to emergency responses, always there to save the day for the City and his teammates. His superpowers? Dedication, reliability, and top-notch customer service. Truly, Francisco deserves a standing ovation for his daily dose of awesomeness!

Congratulations, Francisco!
Thank you for going above and beyond for the City and our residents!

Honorable Mentions:

Shanita Kelly: Recognized by a customer for exceptional service, Shanita is appreciated for her kindness, professionalism, and dedication. Her positive impact on customers is highlighted, and she is thanked for representing the team excellently.

Sky Stelter: A dependable member of the Southern Recreation Center team, Sky is known for her kindness and support towards coworkers and residents. She remains calm and professional under pressure, enhancing the experience for visitors and making the center more welcoming.

Everyday Heroes:

Rain Marti & Carter Dippel: These front desk employees at the Community Center showed outstanding compassion by sharing leftover food with a mother and daughter experiencing homelessness. They consistently receive positive feedback for their exceptional customer service, reflecting the department's values.
