CONTRACTORS NEWSFLASH

Construction Sites and Roadways

July 3, 2025

The City of Palm Coast anticipates significant rainfall in the upcoming days.

It is essential to ensure that construction sites are properly managed to prevent hazardous conditions that may affect the surrounding neighborhood.

Roadways must remain clear of dirt, mud, and other debris. Additionally, construction sites should be adequately secured, with **swales and temporary culvert pipes kept unobstructed to allow for proper drainage.**

All necessary erosion and sediment control measures should be implemented and verified as needed.
