

CONTRACTORS NEWSFLASH

Hurricane Milton

October 7, 2024

Due to the excessive heavy rainfall expected this week from Hurricane Milton, Stormwater/Right of Way inspections **will not** be performed Tuesday, October 8 – Thursday, October 10th.

Inspections are expected to resume on Friday, October 11th conditions permitting.

Construction sites should be secured, and swales and temporary culvert pipes are free flowing, not obstructed in any way and check all appropriate erosion/sediment control measures as needed.

Inspections scheduled during that time frame will be cancelled. You will need to request the inspections when you have verified the site is ready.

This applies to final survey review/inspections, anything submitted will be scheduled for Friday.

****Please note, this does not include Building Inspections at this time.**
